Senator Etanforc's Wild Scheme of Loaning Money to Fa mers-Forecast of Congres sional We k the Coming Week

WASHIN TON March 9 - [OREGORIAN office corner I ourteenth street and Ponnsylvattar avenue 1—The senate and house are likely to split on the subject of the Windom a iver and the substitute therefor that has been favorably report J from the finance committee. The hence committee on bank ing and currency and in interesting session yesterday at which the Windom bill was liscus ed. A test vote was had by which it was developed in t Mr Windom has a man pority of at least two on the committee in favor of his lift Mr Bland brought out this fact by moving to strike out the first section of the Windom bill and insert for it the first section of the bill as reported in the "chate The effect of this would have been to defeat the main portion of Mr Windom's bill which provides for the deposit of bullion and the issue of certificates at the market price of siver. The vote on Mr. Blands in thou was 6 years and " mays. By a vote of 9 to 3 q motion of Mr. Bland to strike out the irm itation of the purchase of the treasury to domestic products was also defeated

domestic products was also defeated.

Mr. Mutcheler of Prinnsylvania attempted to I mt. the purchase under the hill to \$4,000,000 worth per month, but this was lost by tife same vote inversed. With the senute committee yr ret colly unanimous in opposition to M. Windom's policy and a majority of the house can mittee in favorer it, the outlook is good for a rather spirited controversy on the saver question.

controverse on the sinver question.

In the senate the bill will not be taken up until after the Mckinley administrative bill is disposed of It is the plan to get this measure before the senate immediately after the debnt is ended on the pending Blair bill. It will ver bill was reported from the finance committee by Senator Jones and he is to have charge of its consideration in the senate. Mr. Jones timbs that nine-tenths of the senators are infavor of the bill and he would seem justified in this assertion by the fact that the Eastern members of the hance committee as well as these from the vert gave them support. The only men who voted against it in the foombittee were Benators Sherman and McLerson. It is a fact not generall known that the reason of Mr. The allowing the house hill of his committee were benators where mainty in the fact that it provided for the has a hill of his own which the committee matched in the fact that it provided for the purchase of silver builion to the market value of \$1,000.000 per month and the Issu ance of certain certificates receivable for customs tixes and public debts and when so received to be ressued. Mr. Snerman has given notice that when the bill comes up in the senate his will move an amendment the effect of which will be to restrict the purchases of but not of \$4,000.000 worth in tead of \$1,000.000 worth as now provided for Senator Jones will make a speech upon the general subject of silver comage, and hopes to have the bill passed in the senate by at least a two thirds vote. In the senate the bill will not be taken up

Movrardi March 9 -- Mrs Oresine Coller att wife of a wealth; Canadian farmer and her seven children were burned to death in her seven children were builded their bome in Cote St Michael Ti their home in Cote St. Michael The family ived in a large stone house. At an early hour this morning the huiding took fire and before assistance could be given was bursed to the ground. Collerette had left thehouse to attend to work about the farm and on re-turning found the place in finmes He tried to rescue tha family, but was overcome and fainted He was terribly burned. The fire was caused by the explosion of a can of

ker osene oil

As soon as Colorette saw the flames he rusted toward the house. At the door he was met by a burst of fl mes. Then he ran rushed toward the house. At the doof he was met by a burst of if mes. Then he ran to tuc rear. Only smoke was coming out of this door, and into it Colerette dashed. He got as far as the door of the sleeping apartment, but here was a rolid wall of finme. The floor was a rolid wall of finme. The floor was burning beneath his feet. The ceiting was burning over his head and the four waits of the room in which he was were burning flerely. To get to the stairway leading to the upper floor was utlerly impossible unless he dashed into a secthing causidron of fire, wherein he had last seen his wife. He could see the bed, but it was a mass of flame and empty. He felt him-elf being overcome by smoke and heat and seeming to go mad as he now explains it and not knowling what he did, he made a rush for the door through which he had entered. It was on tre, but Colerette got through and out in the series of the country of the scene within live minutes after the explosion took place but even then it was impossible to approach within twenty five feet of the building. The ground around it seemed to be ablaze and the men who dragged Colerette out further danger were badly singed. The bodies of the victims were all charred, and that of Mrs. Colerette was the only one found.

FIRE AT SPORANE PALLS.

Good Work of the Firemen Fraventa 16s Spread.

Spokanz Palls, March 9 - (Special Telegram) - A fire broke out in Ross Iron Works, on Big island, shortly after 3 o -lock this morning. An alarm was turned in by telephone from the Penobscot house, ad-joining the from works on the cast. The fire telephone from the Penobscot house, adjoining the from works on the cast. The fire
department turned out promptly but
the hydrant was found to be frozen solid.
The hose was carried back to a hydrant
on the corner of Howard and Main streets,
and after a long delay the water was turned
on In the meantime fire had been making
rapid headway, and the building, was
doomed before a single hose at hand threw
water. A high wind was blowing and the
Penobscot house was soon ableze and attention was turned to saving that structure,
which for a time seemed doomed. The
from works building fell in, and in a few
moments the fire which had gained
good headway on the side and
roof of the Penobscot house was
under control. The iron works were a
total loss. The Penobscot house, a large
three story huilding was damaged to the
extent of \$700 or \$500. The loss on the from
works was \$500 dop partially insured. The
firemen fought nobly after they got to work,
carrying hose through the flames between
the burning boilding and the Penobscot
house under the cover of a wet carpet which
was thrown over them. The works were
owned by Oliver Ross & Son and the fire is
supposed to have been of incendiary origin.

A fire took place at the village of Hodogay, I chruary 8 h destroying two hundred and seventy buildings. Allows as soon as the fire started under the influence of a powerful southerly gale the flames advanced rapidly in the direction of the village of Kanagawa whi c at the same time the glare in the sky indicated to the residente of vocama that an unusually fleree conflagration was going on Yamashita and Shibomura, the two localities [that suffered are practically continuations of Hodogaya being altunated close along the base of a bind? The fire broke out in a small tenement us orign being supposed incenduary. It was at once communicated to larger houses and easily crossed the wagon road which passes through Yamashita. Thence the flames advanced along the base of the high bind burning first one house then leaping to another, then another and still another at last burning nearly every house that lay in their course and m sking frequent d versions up the face of the hill. Here and there large godowas were left standing to attest their value in times of danger but for the most part the combined villages have been leveled with the ground. The fire traveled about half a mile along both sides of the highway, it being aimost impossible to do anviting in the way of checking it in consequence of the great heat and volume of smoke and sparks that rolled along before the flames. Finsily after burning for five hours the fire seemed to exhaust itself. MANY DIFFICULTIES IN THE WAY Friends of the Defeated Measure Strongthening

Their Forces for Another Vote Upon 1.-Ropes of Success. OLYMPIA, Wash., March 9.—[Special Telegram.]—The friends of the joint committee's tide lands bill have been strengthening their

forces since yesterday and claim they have a sufficient number of votes to pass the bill. They now have thirty-seven votes, including Edens, who is away and will make certain concessions, which they hope will concellate for the bill by Tuesday.

It is quite probable that amendments will be mude embracing the first, third and fourth suggestions submitted by Judson of Pierce to the committee on harbors and nav igable waters last night. These provide for the platting of lands confirmous to cities the e plutting of lands contiguous to cities, for e sale of lands to the highest bidder when a building owner or improver has neglected to exercise his rights of purchase within th time specified, and for survey and platting o. lands not contiguous to cities, only when Many friends of the bill are not salisfied with it as it starffs and will gladly accept with it as it startis and will gladly accept these amendments. They say it will make a more perfect hill, if amended as proposed the bill will strengthen its friends and gain votes. The reason the triends of the bill stood so firm for it was that they preferred it to no legislation at all.

The amendment providing that lands not near cities be platted only when application to purchase has been made is a good one. Without it the state would be competied to survey at an enormous cost the entire shore line of Puget sound, which is 1900 miles long. Inasmuch as a large part of the lands

survey as an enormous cost the entire sucre line of Puget sound, which is 1900 miles long. Inasmuch as a large part of the lands so surveyed would not be valuable for many years, it is doubtful if the amount realized from the sale of all tide lands at this time would pay the cost of survey. The moment they would be surveyed they would be gob-bled up by speculators and held for expected advance in values in years to come. This is what some of the opponents of the bill ob-ject to. They want the state to pocket what is to be gained by the increased value of land.

It is said a delegation will come from Tacome to morrow to labor with Representa-tive Judson of Pierce concerning his opno-sition to the bill. They will urge that if the present bill is defeated it may be impossible to pass any and hims the commercial inter-ests and the general prosperity of the city will be retarded.

A delegation will arrive from the Steptoe A detention will arrive from the Steptos region within a few days to boom Herron's Bherman county bill. The tide lands men are determined to get even with the Spokane and Whitman county men, and say they will pass the bill. There is talk among Eastern Washington men of introducing a retaiory bill to create a new county out of ritions of King and Pierce counties.

Sample, of Vancouver, Wash., Messrs, D. T. Ruffin and W. W. Hester, of Port Townsend. The Intertwo gentlemen are investing largely in Anacortes real estate. Quite a number of Port Townsend citizens have purchased lots here and will undoubtedly realize a rich havest from their investments.

The whaif, end of P street, is now nearing completion, a large staff having seen put on to push the work forward ready to lay the rails now lying at the wharf.

The daily artival of freight is something annazing and the authorities have now made complete arrangements for hault of the same and the public seem to appreciate the Oregon Improvement Company's system of regularity and despatch.

Another latch of suspicious charecters was expelled from the city last night. These decisive steps on the part of the citizens committee to keep the town orderly are appreciated by the respectable class of citizens. Several contracts have been cheen in connection with the Scattle & Northern railroad (Anacortes & Atlantic) in the way of trestling and bridging, telegraph line, drawbridge, cars, etc., and a contract with the San Francisco Bridge Company has been closed, for trestling and bridging the entire line up the Stagit valley, the work to be begin in a short time. Another contract has been signed with Tatum & Bowen, of Portland, Or., for a drawbridge over the Swinomish slough.

Representatives of the state and county alliances have been given audience by the bisbop, and nave assured him there was no desire to comfact with the views of the caurch and all religious parts of the constitution would be chimmaded. In view of this reassurance, Bishop Finks addressed a letter to A. M. Thistiewant, a member of the inflance, stating his objections to Catholics joining the alliance were withdrawn.

The company have ordered thirty flat care, ten hox care and two cabooke cars from Seattle machine shops, and the order will be filled without delay. Progress, progress is the order of the day in America.

The proshytery of Puget sound appointed a special committee to visit Anadories with a view of organizing a Presbyterian church. The committee consisted of the Rev. Benjamin Parsons and Rev. James A. Laurie, both of Sentile. A meeting of those interested was held at Mr. Amos Bowman's rejdence, and Mr. Bowman kindly placed his hall for public worship, until such time us the congregation became too large for the from. A suitable edifice will be arceted as soon as possible. C. R. Dunnell was elected and installed as ruling elder. Articles of incorporation were adopted and signed by all the members present, and Rev. KANSAS CITY WORKHOUSE. Prisoners Crowded Into Col's and Covered

KANSAS CITY, March 9.—The charges made by Alderman Ford, concerning the prisoners contined in the workhouse, are found to be true. Two reporters of the Times investigated the matter yesterday and found about seventy-five male prisoners crowded into narrow filthy coils reeking with vermin and not provided with sanitary regulations. The men are constantly manacled with shackles, weighing from five to twenty-three pounds, and are therefore prevented from bathing. For these seventy-five prisoners there are but two grands. The guards say that on account of the desperate character of the men it is necessary to shackle them to provent escape. It is thought likely that the new brick prison, to be erected, will be provided with proper sanitary regulations and a sufficient number of guards for the prisoners to do away with shackles. annel to be true. Rollef and Cure by Electricity.

To Whom IT MAY CONCERN: Through the testimonlais which appear in almost every paper of the state praising Drs. Darrin for their skill in curing and relieving the allicted who call on them, I sam happy to say I have at last found a road to health. I have suffered for years with kidney complaint, causing great pain in my back, and extending down to the sciatic nerve, at times almost unbearable; also loss of vigor, energy and courage. I had about given up that there was any help for me, when I met Dr. Darrin performing his lightning cures. Now, after a few weeks of his electro-magnetic treatment, I leel almost like a boy, and perfectly free from pain. If anyone suffering from any curable disease will give the doctor a trial in my judgment, you will be entirely curyal. I cheerfully recommend them to the afflicted.

Respectfully, J. W. Kleney,
Long Creek, Grant county, Or. Relief and Cure by Electricity.

A Remarkable Cure.

A Remarkable Cure.

Editor Daily Oregonian: For many years I have been a great sufferer from various afflictions, which women are subject to, towit: Womb, kidney, stomach and head troubles, with such severity at times as to become nearly insane and prayed that death would come and relieve much my sufferincs, as I saw all former physicians and remedies prescribed afforded mo no relief, and despaired of ever getting well. In this concition I was induced to call on Drs. Darrin and censuit them in reference to my case. They gave me encouragement and I put myself under their treatment. Now, after a few months' treatment I feel like one snatched from the jews of death, their treatment has brought sunstine and brightness to my much, healthy action to my liver, strength and vitality to my stomach, and perfectly free from pain, and my other troubles are gone. I gladly give my name to the public as one rescued from suffering and death by Dr. Darrin's peculiar treatment. Can be referred to at Princsville, Oregon.

A Berconary Prince.
San Francisco Chromicie.
The De Looz scandal, which was cabled two weeks ago, is still the subject of conversation in Paria. The Prince de Looz, a member of a well known Belgian scristocratic family, was well known in the American colony because of his fudustrious hunting of American betresses. He was married by civil occremony to the daughter of the Portuguese consul-general, senor de Faria, but on the morning when the religious eccremony was to take place he refused to attend unless his father-in law first paid him the sum of \$10,000. Senor de Faria gave the prince a black eye, but Mille. Faria remained in a peculiar position, being maeried according to French law, but not considering heresties by the ecclesiastical law. All attempts at reconciliation by the parties concerned have so for falled. The prince sticks to his claim for \$10,000, and Senor de Faria has indignantly refused to concede the request.

He lived in the forks of the Santiam when Joab Powell was pastor of the community and assisted in running the first newspiper published in the now fown of Soio. He solemnly says that they printed it one white rag or canwas and issued, other renders with the understand ing that they were to read wash and return,

The Ashland Record says. Two pontoon bridges a hugo pliedriver and a donkey engine passed north to Low creek Sunday. The bridges weigh fifty tens each and are about fifty feet an length. The were transferred over tunnel 9 on rollers. They will be used in Heijer lake as a temporary budge for the in Heifer lake as a temporary bridge for the Two more came up on Tuesday orning These bridges will be floated and one will hold up a weight of 100 tons

Live little boys of Albany, ran away from Eve little boys of Albany, ran away from home Monday evening having matured a plan to become tramps, which they proceeded to carry into execution by taking a custioned seat on the brakebeam on the overland train. They want as far south as Junction where they were discovered and put off by the brakenan. They passed the night althout supper and posterday morning returned to Albany having taken blind havener ansayare back to that city. They baggage passage back to that city They accepted lie m iternal ripper and breakfast with good grace and will probably not hanker after the life of a tramp any more

One of the politicians of Ashland is evi cratic sariy The following letter was printed in the Ashland Julys and ugiced by D. McCarthy. Information having reached me through friends in virious por tions of the county that in the talk now going about cindidates for county offices I have been mentioned as one who as seeking or would necept the nomination for sheriff at the next democratic convention, 1 desire to announce that I am not seeking nor would I accept a nomination for office and I wish further to make it known that under the present management of the domocratic party here I preter to take no part whatever in local polities

Dempsy leaves for Tacoma this morning is company with Tom Cleary to meet an eaggement at that place. He will appear on the stage with Cleary in a contest for point. Wednesday evening he will spar John Clark, the clever lightweight, in Senttle, and there will be net by McCarchy, who gill come back with him to Portland.

A contest worth seeing will be that between Frank Glover and Conley, the victor of Saturday night's match. Glover has been in the city several days and is looking for a match. He challenged the winner of the Conley-Fishrity fight and Conley will secommodate him. Glover has a good retord and is game to the backbone. He is shill do no one, and as Conley's ability was seen in the ring Saturday night, the motch will be a good one without any doubt. Someone picked it up, and, it is hoped by all who saw it, and it had of misery.

New Invention.—Mr. N. F. Murphy, of the Wilmingto Iron Works, has perfected an ingenious mechanical contrivance which he claims will wind, open dust and close up a clock without taking it down. He guarantees it to do all this, Mr. Jurphy is quite as fait upon the strong points of his new invention, and his discussion of it is too lec'hilcal to be readily understood hy the unscientific reader. He has amplied for a palpari on it, and has refused an offar to sell it for a good round sum. He will corfine his speculations to disposing of county and other rights.

cations there, have found it necessary to perpotrate some such offense as defacing a building or taking some little article from a store in order to gain the desired sectusion and comfort of the sheriff's hostelry.

In the eastern half of the cells are those awalting indictment, sentence or commitment to Salem. Among them are several well-dressed and well-mannered men.

The prisoners are twenty-three in number on the hobo side and twenty-cight on the other. Each one is provided with a small tin basin. Thus accounted, he takes his place in the single line of march up to the door, receive his dipperful of steaming coffee and makes way for the next-man. The food is next passed in on tin plates. It is clean, wholesome and plenteous; chiefly meat, beaut, jotatoes and bread. Sheriff Keily always buys the best of all staple lines of provisions, and the steward is an excellent rock, who has sheld the place for years. Jailer James says that what few complaints there are about the food invariably come from the hobos, who, when outside the juil, go hungry, with the moisty they hypothecate from free saloon lunches with what beer they drink.

It is quite an interesting study to watch the prisoners as they come the strawborry blonde, for obtaining money under false pretenifes, receives his plate with the grace of a Chesterfield. Young Lewis, the embezzier, awaiting sentence, has allowed bis wiry beard to grow, and has lost bis air of braggadgels since he was found guilty. Pillio, the Indian sentenced to he hanged June 6, views his food with a stolid indifference; Ah Sucy tho optum fiend, hestows upon it a very critical inspection, and Louis Bernard, the Rainfer ronchman held for murder, has all the metanchoiy air and intellectual abstraction of a Hamlet. Dissatisfied with his lot is the muratto, John Allern, of the Second and A shooting example. Buckley does not seen to be pining away after his long sentence.

Very few of the prisoners now at the juil have friends outside who remember them. They are Roberts, Olds, Cody, and once in a

They are Roberts, Oids, Cody, and once in a while one of the others. These three are remembered with those delicacies which are common enough outside, but doubly appreciated within prison walls.

Sandy is in good health and condition. The transcribing of the proceedings at his last trial are about completed. He is still an object of attention from his former associates, who have with characteristically open hands stood by him in his dire extremity.

The reporter bad a few words with the elder Roberts. 'No, I think Thre Orazontan hashad enough to say about me arrangled that it is rarely possible to get information favorable to an accusad man, either from himself or his friends, while those who are working for his conviction are ever ready to make damaging statements.

"That, I presume, is true," he repiled, "but there is nothing I care to say, except to express my gratitude to Sheriff Relly and Mr. James. They have shown me all possible kindness consistent with their duty. I am not in a very pleasant predicament, having my son with me. It is not calculated to keen a man in good health or spirits,"

Al Cody's fate is still waiting the receipt of additional papers from Salem.

Abile Wallace, of saloon tarceny fame, has been joined by Mrs. Nell's Enwright, sent up from the polica court for adultery with her friend, Mark Kale. These are the sole occupants of the women's cells.

FLOOKS OF GRUSSBEAKS.

Many of These Handsome Birds Seen About the City-They Are Native to This Country.

There is an unusually large number of these preity birds, the grossbeaks, around town at present. A flock of several hundred was seen in one lot yesterday. Although It was settled conclusively some time since that they are natives of this country, some persons still cling to the idea that they were brought here originally in a ship from Australia, the islands or China, and the street gamins call them "China parrots."

street gamins call them "China parrots."
This name is not altogether inapproprinte, as they have a large, strong bill, and a comparatively chunky and slow-motioned bird, like a parrot.

The fact that these birds increase in numbers from year to year, and that they were not noticed until a few years ago, tends to confirm the theory of those who claim that the original stock was imported, but the birds are beyond question native to the United States.

the original stock was imported, but the birds are beyond question instite to the United States.

The fact that the youngsters call them Chinese parrots is a sample of the aptitude of the unscientific in the way of providing or corting names for anything they do not know the name of, which is noticed in the poems of the late Martin Farquhar Tupper, which, perhaps, some readers of The Oncontan have not read, and which they might like to read just once. Speaking of the appropriateness of the common names of many flowers, as compared with the scientific names, he said:

Never before has millinery attained the degree of perfection which it now holds we are just entering a new era, and one consisting of many wonderful and startling changes. THE MODISTE must indeed be an artist of great and varied experience. To begin, no hat is to be trimmed, except patterns, until it has been fitted and moulded on the head of the lady for whom it is intended, then a careful study of the face is absolutely necessary before the design can be carried into prop-

WE POSSESS THE MODISTE.

The Spring loves of Bonnete and Hats have seldom been equalled and never excalled; but few new colors are premised. The Monsereau is a pleasing shade. The Admirsl, Gendarme, Sapphire, Paon, Chasseur, are various shades of Blue, ranging from a Marine to a Navy; Vermouth is a Greenish Grey. The new color just produced shown in all imported goods is the Glueton a very pale yellow, while a light beige with a tince of lavender is known as Champignon, Paille and Bonton d'Or, two dark shades of yellow; Persan, between a pink and mauve, and Parnell is the name given to a bright vivid green.

As this is to be a season of Elegant Laces and Draperies, we are given the soft Silks, Crepe de Chine, Surahs, and Silk Gauzes in all new designs. In trimmings, we are led to believe that Velvet Ribbons, Satin back, will more than double the popularity that it enjoyed the past season. Laces of all styles and varieties will be used both for Hat and Dress Trimming, from the narrow to the beautiful silk gauze hand-embroidered laces-CHANTILLY, VANDYKE, EIFFEL TOWER POINTS, in Cream and Black are the favorites. FLOWERS will decorate most all hats. and never was nature more closely simulated. The fine flowers predominate. Many bonnets will be composed entirely of small buds. Forget-Me-Not or Lilies of the Valley, finished with a large bow of wide fancy ribbon. Buttercups, Lilies, Crysanthemum; Lilace and small French Piquetts will be used extensively.

Black will be very popular, but as a trimming mostly; it obtains largely on hats and bonnets, whose foundations are formed of the lighter and brighter shades; the effect is greatly heightened by the contrast, and it subdues that which reight otherwise seem displeasing to the eye. The endorsement that yellow has received will make it extremely popular, and the entire scale, from the deepest Orange to the light Chamois and Blanc-mat, will find favor with those seeking the color that is acknowledged by all artists to be the most flattering to the complexion. This color combined with black, green, brown, grey or mountain purple, is one of nature's own combination. In regard to trimming and shapes, we have that which is noted for its distinctness from the season just passed. In shapes, large hats will be used for out-door wear, where the eyes are to be protected from the sun's rays, but they can never fill the place of the TOQUE for dress occasions. The TOQUE alone is admirably adapted for this, and lashionable women readily recognize the fact, Open crowns, with silk wire and narrow ribbon lace over, is a feature of these artistic creations. DWELLERS IN GLASS HOUSES.

A does not lie in the mouth of any of our friends in the East to gird at the legislatures of the new Northwestern states. There are legislatures every year in the older states more corrupt than that of North Dakota. more stubborn than that of Montana, mor of all does it become our friends, the enemy on the democratic side of congress, to cite the short comings of the legislatures in the new states as an argument against creating two more new commonwealths in the North west. For our friends the enemy must bear more than half the responsibility past disgraceful proceedings in cartain legislatures of the older states, whose memory should make them char-itable to Montana and Washington It was a democratic plot to seize the gov-etnment of Muine in dehance of law and the popular will, a few years ago that threatened the first state ever admitted in o the Union with a relapse into anarchy more complete than ever awaited Moitana in her worst And it was a democratic refusal to abide by the popular verdict and a demo-cratic determination to seat a governor not fairly elected through the agency of a parti-san court that kert West Virginia in a forment for a yeer and suspended and unsettled all the orders course of legislation and administration there. This sort of thing happens every two or three years in West Virginia vet we do not hear on the floor of congress that this offshoot of the Mother of States is too backward in civiliza tion and mapt in politics to be fit for state

We commend to our friends in the East the comparative study of the instory of state legislatures in all parts of the country, during this very winter. The Northwest will have no occasion to blush for itself in the parison If the North Dakota legisla ture listened to the seductive voice of the Louisiana lottery siren until recalled to its senses by the indiguant clamor of outraged nion the Town legislature sold itelf body and soul, to boodler Brice without evoting any popular profest at all deadrock in the Montana legislature finds a fair noraliel in Ohio, where it took weeks to elect a speaker, and months to elect a sen-ator, and a trade of offices which would be called brazen commerce in public place, if it took place west of the Rocky mountains, to organize the legislature. The newspapers of North Dakota were apparently passengers in the same craft with the legislature and have been very modest in their references to the lot-tery job. But the press of Montana and Washington has spoken its mind rather freely, and nobody is the worse for it. That

Shakespeare always speaks of suicide as a sin, a transgression of the divine law. The only famous writer of Shakespeare's day who defended suicide was Montaigne who argued that since no man was responsible for being born into this world it was not fair to condemn him for dropping a burden which became his to carry through no faul of his own. The obligation to make the best of himself within the possibilities of that moral conquest, undurance and accre-tion we call character is felt by all men of conscience and suicide is the violation of this obligation by evasion of the burdens and responsibilities of life through cowardly light Sundle is therefore a sin, since it is a violation of the teachings of the divine law within us that we call conscience Socrates and Shakespears felt this while the cheerful, but comparatively shallow old Gascon philosopher Montaigne either could not see that his defense of suic de was a spiritual fallacy or pretended to be blind to it

GODLLSS SCHOOLS The Roman Catholic bishop of a New Jer

rev diocese recently announced from his pu' pil that Catholics who persisted in senong their children to the common schools rather than to the parachial or church schools would make themselves hable to ecclesiastic discipline and punishment even to the point of excommunication The educational theory of the Catholic church is that the American common school is a 'godless' school and no less man than Cardinal Gibbons pro poses to divide the school fund, if possible and if that is not possible to establish paro-chial school. The church has already es tablished 6000 parochical schools seventy five colleges and has a new Catholic university at Washington It is true that our common schools are in theory 'godiess, 'just as our bederal constitution is 'godiess, but while we do not teach religion in our schools, we do teach morality. We do teach that viodo teach mornity We do teach that vio-lence, falsehood and impurity are sine, and we can and do teach this without offending anybody in his religion In Costa Rica, one of the principal states of Central America the Roman Catholic Bishop Thiel presched a sermon in which he advised the people not to send their children to the government schools, because most of the teachers were foreigners and. Protestants. Don Ricarde Jiminez, the present secretary of state, of public instruction and religious matters, at once addressed the bishop a letter, which was published in the official newspaper Among other things the secretary ways.

Our educational law declaively forbids the teachers to attack in any way the religious convictions of the families whose children are some field to their care and thus far this wise fundamental principle has been carefully observed. The state gives no religious instruction, for it comprehends that this is a matter to be left to the family or to other organizations whose purposa is to maintain and diffuse religious creeds, and which organizations should be able to fulfill their functions freely here, as is done in other countries. But the same principle which serves as political basis in this particular, which is none other than a respect for the liberty of conscience is at the same time tha most powerful guarantee of religious neutrality in schools and colleges. was published in the official newspaper church, since in order to express dissatisfac

it must claim that upon the laity devolves the duty or imparting religious instruction, which in calify is its own Convinced, therefore, as is the government that in none of is branches has it attacked the church, nothing is more natural than that it exact from the latter the same conduct in respect to the state a chuestional institutions and still greater reason hazit for not consenting that an adverse propaganda be uttered upon false data.

The government hopes that the matter having been corrected in this way, you will have no objections to obstain from further attacks of the sort in which ease you will be doing justice to the trum a course that cannot be single-shot to you, considering your evangelical miss on and rectiti de of procedure. In expressing this feeling the government keeps it well in mind that church and state not being separated in Costa Rice, the former in return for the exceptional advantages it enjoys, should duly respect the latter and avoid unsking difficulties for it instead of creating them.

In Paris the electric light ug companies have all their conductors under ground and there are no overhead telegraph wires unsulated in electric cables and are placed under ground in the sewers. In Berlin all the electric light wires are underground and the lighting is all done by continuous cur rents at the low potential of 100 volts. In Beigium, as in Germany electric lighting is done chiefly by continuous currents at 160 volts Eir William Thomson the emittent Enghab electrician, is authority for the statement that 100 volts in the house is perfectly safe for the user and he says there is but one city in the world, outside of Fugland or America or Italy, in which high-pressure overhead w.res are used, and that is Lomes var in Hungary England nereafter intends pensivo in the air than they would be it placed under ground. Something Interesting About Horses and Horses men-Advertising the Industrial Pair-Spring Is Beshful and Backward

Notwithstanding that the day was a far from p easant one for outside labor, there were three large gangs of men at work on the faironds and Terminal Company's grounds along North Front street. The im-provement of that street is now well under way and seems likely in course of time to become an accomplished fact, and this the ratiroad companies appear to realize and they are hastening to reduce the chars of their tracks etc. to some kind of order, to place (hem in keeping with the new state of affaus.

The Terminal Company is making quite an expensive and extensive change in the broad sidewalk of four such planks lately constructed along the front of their 800-loot union freight depot This sidewalk was constructed nearly on a level with the street, with a fine board apron extending the full length of it, so that teams could easily back or drive up on it, the intention being that trucks should stand on the sidewalk trucks should stand on the sidewalk with the floors of them on a level with the floors of them on a level with the hv the Industrial Pair Manual has by the Industrial Pair Manual has floor of the depot, so that freight could be wheeled conveniently from the depot to the track, or vice versa, and the freight and the men handling it be protected from the rain by the roof extending over the sidewalk. This was very good scheme in some re-spects, but id did not mest with the approval of the council, and they passed a resolution forbidding truckmen from driv-ing on the sidewalk. Then the company ing on the snewsk free the company had long inclines made, extending from the doors of the depot down to the trucks, and up and down these the freight was trucked in and out. The council did not approve of this plan, and ordered the inclines removed. This settled it, and the company are now raising the whole long sidewalk up to within about nine inches of the level of the depet about nine inches of the fever of the depot floor The sidewalk is first torn tp, and then the planks which formed the aprob-are pinced along across the seepers on their edges, and the sidewalk re-laid upon them. This ratios the side-walk a foot and brings it up so that only a short incline or apron will be made at each doorway and the trucks, when backed up to the aldewalk, will be about on a level with it, and freight can be handled with facility This will probably end all trouble about the sidewalk, and everybody will be happy

There are signs of other improvements in that vicinity. The old sidewalk to some distance south of the freight depot has been distance south of the freight depot has been torn up, and will be replaced with a new one and the unsightly hollow space at the north end of the depot has been it led up north end of the depot has been if led up north end of the depot has been if led up put a clean white sand which greatly improves the appearance of the place. Things are also being tidled up a bit. Tracks are being leveled and ballasted, and some clean gravel is strewn around in spots A gang of men were at work just opposite Columbia dock placing railroad ties in the mud for a platform on which to pile rails. The street in this vanisty is in a horrible coudition. All of it which is in sight is occupied by three trucks, on each of which yesterday stood trains louded with wood. On the extreme east side of the street is another track in front of the warehouses, and the only place where a second of the country of the street was not the street. witchouses, and the only place where a team could be driven was through a narrow fake of slumgullion, which occupies the space between the tracks and the aidewalk, or the place where a sidewalk ought to be.

North of this the tracks have been raised to the grade, and some filling has been done by the contractor for the improvement of by the contractor for the improvement of the street Near the electric light works a large gang of men was employed yesterday in rushing the tracks, for there seems to be everywhere more than one track, to grade By and by, when the whole of North Front treet is improved, and the railroad tracks of things in this part of the city will be much changed for the better, but it is very doubt ful if North Front street will ever be of much use to any one except the railroad companies who seem to have need of the whole of it in their business.

Special Reasons Why the Hunt Proposition Should be Accorded

Porti and March S — lothe Ed for the citiens of Portland for dec sive action it is well that they proposition is brought before the citiens of Portland for dec sive action it is well that they should have a therough understanding of the unster and he made fully aware of the vital mecasity that exists for Portland accurage a line to the interior which is not bound up with the transcent neutal association. Portland now has not a line of railroad that she can call her own or can in any way countred. The Southern Pacific has secured the O & C hues and the Union Pacific the O & A N lines and the interests of these ilines are not ideutical with those of I ortland Their head offices from which the workings of the lines are controlled are far away from I or land, and their business is transacted by men who have more interest in and friendsh p for other places than they have for Portland. The rails of all interior towns of the northwest is now as all shippers know the nate from the East to Portland plus the rate from Portland to those towns. This advantage in favor of I ortland cannot always last as the interfor towns flight against it and the tendency of railway legislation in the last of the tendency of railway legislation in consistencies why with all inequalities and inconsistencies which with all inequalities and inconsistencies which with all inequalities and the rail of the state of the property of the property towns must empty into the property of the prope

PROSPECTS

ANACORTES, March 7 - Intelligent and far seeing men of the day are bound to admit that if there is a region more than another in the state of Washington renowned for its wealth of natural resources it is undoubtedly the Skingit river country. Its mountains abound with gold and sliver coal and from the vast deposits of which have as yet been barely touched and which means millions of dollars to the country in the near fature. Thousands of acres have, et to be taken up by settlers, and the wonderful prosperity of to-day is only the beginning. The future will be beyond all hope of the present. The farms too, of this section of country stand unrivialed and all these combined most have an outlet—a metropolis and a center of distribution. A careful analysis of the geographical position of the country shows at once that Anacortes is the best in fact the only practicable site for a big city. With such advantages as these and with the well known back country. Anacortes' inture is assured. It is not a speculation but an absolute certainty that it will be a city and a great one. The rapid manner in which property is being disposed of in all directions to capitalists and men of keen judgment and business perception leaves no doubt what ever that Anacortes to day is the best place of all which offers quick and cubstantial returns tor finence invested. The inde of immigration which has commenced flowing into this new commonwealth has surprised everyone. To the far sighted man of means the keen wited manufacturer—the agricul trainst desirous of propagating all that grows in the soil and the home scoker looking for a residence in a thriving prosperous intelligent orderly and progressive community one can honestly invite them to the shores of Anaeortes or the city by the sea. in the state of Washington renowned for its wealth of natural resources it is undoubtedly
